

Have You Ever Wondered How Firing Methods Impact Glazes and Clays at Low and Mid-Fire Temperatures?

Discover how particulates, reduction, and firing conditions influence the visual and textural results to shape the final piece.

Through the creation of 2,800 cups—this study provides a unique and detailed visual reference for artists and ceramicists.

2800 cups.
10,000 photos.

Helpful if you're exploring clay bodies for Co4/ C5 electric firings, managing cold spots in C10+ wood kilns, or seeking low-temp woodfire options for group firing without the need for high-cone resources.
