BONE WHITE
CONE 5/6 PAPER CLAY

"I have used many types of clay in my career, but never have I encountered a clay body that is so responsive to hand-building my paper-thin clay forms. Aardvark Bone White Paper Clay is extremely flexible and durable when wet, sturdy when leather-hard, and can be easily mended and patched even when bone dry. I tried several clay bodies to create a paper-thin plane sculpture, Only Aardvark's Bone White Paper Clay could deliver a successful ceramic sculpture at cone 5 with no cracks!"
