

"My first L&L was a 'barn find' over 10 years ago, and it is still going strong. **The ease of repairing a 20 year old kiln** and getting it operational was what first hooked me, and I've added 2 new kilns to my L&L fleet since then. The upgraded touch screens and app integration are a game changer on my newest kilns, but the **durability and quality** are why they're still the only kiln brand I recommend. L&L makes kilns that are easy to work on and made to last.

It's that simple."
