

# Jungle Gems™ CAN TAKE THE **HEAT**

Packed with crystals that bloom and burst when fired, Jungle Gems™ can withstand temperatures of cone 6 and beyond! Their enhanced movement at higher temperatures creates striking color patterns, allowing artists to take their artwork to the next level. Vibrant colors stand out in all-over coverage or will complement your favorite stoneware glazes.

Visit [MaycoColors.com](http://MaycoColors.com) to explore the color palettes.
