

POTTER

ABOUT US

3D Potter seamlessly merges traditional artistry with cutting-edge technology. Our printers, designed for both enthusiasts and professionals, utilize real clay and cement to create objects of intricate detail and structural integrity. Embrace the future of crafting, where the possibilities are shaped by your imagination.

OUR PRINTERS

3D PotterBot

Our Series of high-quality clay printers. Available in sizes: Micro, Pro, Super, and XL

Scara Elite V2

Purpose-built for printing cementitious materials. It comes with a distal arm fitted for a pump. The Scara Elite is designed to work with a pumping system, such as our Small 50 Pump

Scara Elite RoadRunner

Scara Elite Printer combined with our Roadrunner track. Allows you to make even larger creations, such as full-size structures and walls. Include a pump and you are ready to start printing.
