

GEIL KILNS

Improve Your Workflow & Increase Your Productivity

“This 54 cu ft Geil Shuttle Kiln serves our studio perfectly since we have a high volume of ceramic wares being produced by students & production potters. It improves workflow & increases productivity, which makes everyone happy!

The automated firing system allows for complete control of temperature & atmosphere and shuts down automatically at the end of the firing, saving time & energy.

And with 8 locations; Los Angeles, Sherman Oaks, Culver City, Costa Mesa, Chicago, San Francisco, Brooklyn, & Manhattan. We have a Geil in every location because Geil Kilns are the best.” -

Marshall Blair ♦ The Pottery Studio
