You may have noticed things are looking a little different around here. That’s because we are making improvements to CLAYflicks based on user feedback! We are in the process of adding closed captioning for the hearing impaired, and functionality to make it easier to watch our videos. In case you need a little help getting used to the changes, here’s a quick guide.

1. At the top of each video page, you’ll see a video player featuring an excerpt from the full video. If you’d like to watch it, click or tap the orange “play” button in the center of the video player (circled below).

2. If you’d like to watch the full video, just click or tap one of the orange “Play Video” links toward the bottom of the page (as circled above). The box will expand to reveal a video player as shown below. Then, just click or tap the orange play button in the middle of the video player (as circled below).

3. If you would like to skip ahead to a specific chapter, just hit the chapter icon (circled above) in the video player.

4. A gray bar will appear on the right-hand-side of the player with chapters listed. Simply, click or tap on the chapter you wish to view.
Great News! Closed Captioning!

We are in the process of adding closed captioning to CLAYflicks! This process will take a little time, but we will be adding them as fast as we can! If you see the CC icon in the lower left corner of your video player, the video has closed captioning.

1. Just click or tap the “CC” icon and select “English” to enable closed captioning. For phase two of this project, we will be adding captions in additional languages!

Even Better News: Searchable Closed Captioning!

1. Want to search for something specific in a video? You can with searchable closed captioning! Just click or tap the little arrow (circled above) in the top right corner of your captions!

2. Then type your search term into the search bar and hit “return.” If your search term is in the text, it will jump to that part of the text and the word will be highlighted. Click or tap on the highlighted word and the player will jump to that part of the video. Hit the “X” in the top right corner to exit the search mode.

2. Voilà! Your captions should appear when you click or tap the “play” button. If you’d like to turn captions off, simply click or tap the “CC” icon.
